

Listing of Claims:

1. (Currently Amended) A method for sending an order to an electronic market, comprising:

sending an order on behalf of a trader from a first electronic market to a second electronic market, wherein the first electronic market comprises a first computerized matching process that is configured to automatically match bids and offers received from remote client devices to trade a first tradeable object and the second electronic market comprises a second computerized matching process that is configured to automatically match bids and offers received from remote client devices to trade a second tradeable object, and wherein the second tradeable object is different from the first tradeable object, such that the action of sending the order [[being sent]] is taken on behalf of the trader by the first electronic market itself using a microprocessor executing one or more instructions.

2. (Original) The method of claim 1 wherein the step of sending is performed when a condition is satisfied.

3. (Original) The method of claim 2 further comprising the step of receiving a first order at the first electronic market.

4. (Original) The method of claim 3 wherein the condition comprises at least a portion of the first order being filled.

5. (Original) The method of claim 2 further comprising the step of receiving a market event request message at the first electronic market that establishes a condition.

6. (Original) The method of claim 2 wherein the condition is in the form of a lookup table.

7. (Currently Amended) The method of claim 1 further comprising the step of sending a message from the first electronic market to the second electronic market instructing the

second electronic market to modify the order sent on behalf of the trader, wherein the action of sending the message is taken on behalf of the trader by the first electronic market itself.

8. (Original) The method of claim 7 wherein the message to modify the order sent on behalf of a trader is sent when a second condition has been satisfied.

9. (Previously Presented) The method of claim 1 wherein the electronic market comprises a matching engine that matches bids and offers for a given market according to a first-in-first-out (FIFO) matching algorithm.

10. (Original) The method of claim 1 wherein the electronic market comprises software running at an electronic exchange.

11. (Original) The method of claim 1 wherein the electronic market comprises software running at a point of access that is outside of the electronic exchange.

12-21. (Canceled)

22. (Currently Amended) A computer readable medium containing program instructions for causing a microprocessor to execute a method for use by a trader in an electronic trading system that includes at least one computer terminal connected over a network to at least one electronic exchange, comprising:

sending an order on behalf of a trader from a first electronic market to a second electronic market, wherein the first electronic market comprises a first computerized matching process that is configured to automatically match bids and offers received from remote client devices to trade a first tradeable object and the second electronic market comprises a second computerized matching process that is configured to automatically match bids and offers received from remote client devices to trade a second tradeable object, and wherein the second tradeable object is different from the first tradeable object,

such that the action of sending the order is taken on behalf of the trader by the first electronic market itself.

23. (New) The method of claim 1, wherein the trader is given control over the order and maintains control over the order at the second electronic market.

24. (New) The method of claim 23, wherein the order comprises an identifier to indicate to the second electronic market that the order belongs to the trader.

25. (New) The method of claim 1, wherein the step of sending is performed when a condition is satisfied, and wherein the condition is based on a market event that occurs internal to the first electronic market.

26. (New) The method of claim 1, wherein the step of sending is performed when a condition is satisfied, and wherein the condition is based on a market event that occurs external to the first electronic market.

27. (New) The method of claim 1, wherein the step of sending is performed when a condition is satisfied, and wherein the condition is based on a news event.

28. (New) The method of claim 1, wherein the first tradeable object and the second tradeable object comprise a spread trading strategy.

29. (New) The method of claim 1, wherein the order is intended to hedge risk in the second tradeable object based on a position taken in the first tradeable object.

30. (New) The method of claim 1, wherein the action of sending comprises generating the order.
